Experience

UnB

- **Web Designer Junior** - Responsible for maintaining an EaD platform and website. As it was a public agency all were CMS so I specialized in this area to meet the demand give support when needed.

06 june 2009 – 27 january 2012

Grupo Continental Educacional

- **Web Designer Pleno** – Acting as the main technical responsible for managing a group of colleges spread throughout Brazil, I was responsible for web development, among them: websites, EaD platforms (moodle), management systems acquired by the company and support for other partners.

All web projects were developed using agile methods because the demand was great, I always tried to use CMS, Bootstrap, version controllers and a good documentation.

30 january 2012 – 13 march 2013

CENEBRA Educacional

- **Web Designer Pleno** – Creation and development of website and EaD platform using integrated Joomla and Moodle CMS for sales of courses. In addition to agile development, he was also responsible for technical support and direct contact with the student.

15 march 2013 – 10 june 2013

Mídia Futura – Comunicação e Marketing

- **Web Designer Pleno** – Development of web projects analyzing the needs of each client individually. Survey of requirements, wireframes, study of the needs of the end user, layout in Photoshop.

All tags made in HTML5, CSS3 and JavaScript often using Bootstrap framework for agility in development.

01 august 2013 – 19 august 2015

Central IT – Governança em TI

- **Systems Analyst Web** – Analysis and development of systems and interfaces, mapping of processes, modeling of data and survey of requirements to implement these programs according to the objectives and the business rules of the company.

Analysis of performance and customization of systems (interface) already implemented, seeking technical problem solving, preparation of documentation and use manuals.

08 october 2015 - 15 december 2015

DataInfo
